Report

Overall Performance

Revenue of \$3.9M and profit of \$812.8K yield a 21% margin across 2.5K orders (~\$1,560 average order value) — healthy, but with room to improve.

Regional Performance

North America leads by a wide margin, followed by Europe; Oceania, South America, and Africa remain minor markets. Within regions, performance is uneven — Southeast and West spike (743K–962K), while Gauteng, Kansas, and North lag far behind (66K–176K), pointing to underperforming areas worth investigating.

City-Level Performance

Vancouver tops both sales (\$319.9K) and profit (\$62.4K), ahead of Toronto, Munich, Osaka, and Sydney. Margin efficiency varies by city — Munich converts sales to profit better than Osaka despite similar sales volume.

Category Profitability

One category drives 82.9% of profit versus just 14.9% for the other — a strong concentration risk if that top category ever underperforms.

Revenue and margins are solid overall, but the business leans heavily on one region (North America), one city (Vancouver), and one category — diversification could reduce risk.
